

Extra and Co-Curricular Activities

- Curricular refers to activities, programs, and learning that occurs during the school day as part of the school curriculum.
- Co-curricular refers to activities, programs, and learning experiences that complement, in some way, what students are learning in school—that is, experiences that are connected to or mirror the academic curriculum.

Although the Fine Arts share similarities with extra-curricular activities, their co-curricular status indicates that they should be considered in a different light.
